

Soybeans:

# P03T68R2\* (RR2Y)

RELATIVE MATURITY **03**

## Maximizing Local Performance

P03T68R2 is a high yielding 03 RM variety that performs well across a variety of environments. P03T68R2 has moderate plant height with above average canopy width and provides very good IDC tolerance. Provides solid disease package for phytophthora and white mold resistance.

### Management Comments

While this variety offers good harvest standability, this soybean may lodge in high growth environments.

### Key Environments

High Yield Environment	Insufficient Data
Irrigation	Insufficient Data
White Mold-Prone Environments	Insufficient Data

### Suitability

No-Till/Reduced Till	Insufficient Data
Delayed or Late Harvest	Insufficient Data
High Residue	Insufficient Data
SCN-Prone Environments	Insufficient Data
SDS Prone Environments	Insufficient Data

### Soils

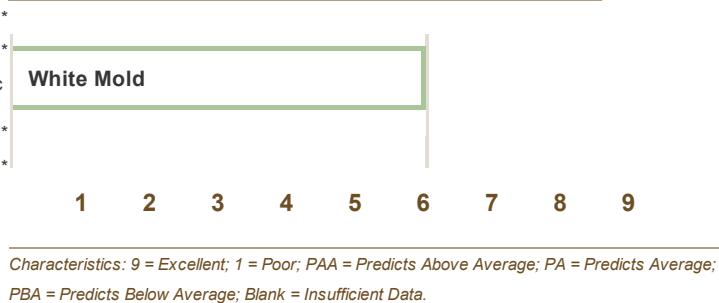

Drought-Prone Soils	Insufficient Data
Poorly Drained Soils	Insufficient Data
Soils Prone to Iron Chlorosis	Insufficient Data
Cold Soils or No-Till	Insufficient Data
Coarse soils	Insufficient Data

## Traits Scores for P03T68R2\* (RR2Y)

### Characteristics Scores

Harvest Standability	5**
Field Emergence	7**
Phytoph. Resist. Gene	1c
Phytoph. Field Tol.	5**
Iron Def. Chlorosis	6**
Shattering	
Canopy Width	7
Plant Height for Maturity	7
Hypocotyl Length	
SCN Resistance Source	

### Featured Traits

### Diseases & Pest Protection Traits

Brown Stem Rot	4
White Mold	6
Sudden Death Syndrome	5**
Aphid Antibiosis	A
SCN Race 1	
SCN Race 14	

SCN Race 2

SCN Race 3

SCN Race 5

Phytoph. Resist. Gene

White Mold

[1] IMPORTANT: Information and ratings are based on comparisons with other Pioneer brand products, not competitive products. Positioning information is based upon historical observations and analysis of traits by Pioneer Agronomists and Research Managers. Trait scores are assigned by Pioneer Research Managers. Scores are based on period-of-years testing through 2012 harvest and were the latest available at time of printing. Some scores may change after 2013 harvest. Scores represent an average of performance data across areas of adaptation, multiple growing conditions, and a wide range of both climate and soil types, and may not predict future results. Products within a family receive the same score unless observations indicate a significant difference. Individual product responses are variable and subject to a variety of environmental, disease and pest pressures. Please use this information as only one component of your product positioning decision. Refer to www.pioneer.com/products or contact a Pioneer sales professional for the latest and most complete listing of traits and scores for each Pioneer brand product.

Varieties with the original Roundup Ready® (RR) technology are resistant to labeled glyphosate herbicides. This technology allows for post-emergent applications of glyphosate herbicide without crop injury or stress (see herbicide labels). Labeled glyphosate herbicides should only be used over the top of those varieties that carry the Roundup Ready gene designation. NOTE: A soybean variety with a herbicide resistance trait does not confer resistance to all herbicides. Spraying herbicides not labeled for a specific soybean variety will result in severe plant injury or plant death. Always read and follow herbicide label directions. Varieties with the Genuity® Roundup Ready 2 Yield® (R2) trait are resistant to labeled glyphosate herbicides. This technology allows for post-emergent applications of glyphosate herbicide without crop injury or stress (see herbicide label). Labeled glyphosate herbicides should only be used over the top of those varieties that carry the Roundup Ready or Roundup Ready 2 Yield gene designation. NOTE: A soybean variety with a herbicide resistance trait does not confer resistance to all herbicides. Spraying herbicides not labeled for a specific soybean variety will result in severe plant injury or plant death. Always read and follow herbicide label directions. Varieties with the DuPont(TM) STS® gene (STS) are tolerant to DuPont(TM) Synchrony® STS® and DuPont(TM) Classic® herbicides. This technology allows post-emergent applications of sulfonyleureas (see herbicide product labels) without crop injury or stress. NOTE: A soybean variety with a herbicide resistance trait does not confer resistance to all herbicides. Spraying herbicides not labeled for a specific soybean variety will result in severe plant injury or plant death. Always read and follow herbicide label directions. Varieties with the LibertyLink® gene (LL) are resistant to Liberty® herbicide. (-) = Variety does not contain a herbicide resistant gene. Genuity® and Roundup Ready® are registered trademarks used under license from Monsanto Company. Roundup Ready 2 Yield® is a registered trademark of Monsanto Technology LLC used under license. DuPont(TM), Synchrony®, Classic® and STS® are trademarks of DuPont or its affiliates. Liberty®, LibertyLink® and the Water Droplet Design are trademarks of Bayer.
